# CONCLUSION

The time is coming and the course is going to an end.

The moment we write this conclusion report is also the time the we have finished the mini-project. After running the project, we learned and gained a bunch of great things such as: how to greate a memory program ( ram), know clearly about the usage and how moore and mealy system work. And the most important thing that we feel so much fun and reallly benificial for us, not only in this mini project but also the whole course, is team-working.

Thank you for all of things you did for us in this course, teacher Ngo Duc Minh . even though the limited of time, you tried your best to convey every necessary lessons for us, and help us a lot when we training in lap. We hope to work with you again someday in lap room. Many happy turn.
